PRO WORK POLO SHIRT

DESCRIPTION

The sort of polo shirt your accountant might wear if he had to install his own office partitioning. It's a super-smart polycotton with contrasting side panels and a taped neckline to hold the collar shape. Wear it for a morning of hard work and for talking VAT to your accountant in the afternoon.

FEATURES

240gsm
50% Polyester | 50% Cotton
Easy care fabric
Contrast panels
Taped neckline

SIZES

S - 3XL

151

ELITE T-SHIRT

DESCRIPTION

The T-shirt that says something about the way you work. It's lightweight, breathable and wicking. And it has that nifty kind of styling that flags its own technical performance. It'll keep you cool, and looking way cooler than anyone who's still wearing a T-shirt advertising a band they saw five years ago.

FEATURES

170gsm
100% Polyester
Moisture wicking
Lightweight
Breathable
Excellent colour retention
Reflective print to shoulders

SAFETY BOOT RATING EXPLAINED

There's a clear system in place to gauge the level of protection offered by safety footwear. You've probably heard the term "S3 safety boots" before.It sounds more complex than it is. Here's a breakdown of the safety boot/shoe rating used in the UK.

SB

TOE PROTECTION

The basic safety standard for footwear. These have toe protection against a 200-joule impact. They may also have additional safety features which will be shown via other symbols. For example, if you see SB-P this means that the safety footwear also has the additional feature of Penetration Resistance of the Midsole.

S1

ANTISTATIC, OIL-RESISTANT & ENERGY ABSORPTION

On top of the basic toe protection, S1 ensures the footwear has antistatic protection, is resistant to fuel oil and has energy absorption in the heel. Again other symbols can be added, such as S1-P as above.

S2

PREVENTS WATER PENETRATION

S2 has all the same as S1, plus the added protection of preventing water penetration and absorption of the upper.

S3

MIDSOLE PENETRATION RESISTANCE

S3 safety footwear encompasses all the same levels of protection as S2, plus midsole penetration resistance.

S4

LEAK-PROOF

All the protection offered by S1 but with an entirely moulded polymer/ rubber (e.g. Wellington Boots) making them waterproof and leak-proof.

S5

LEAK-PROOF WITH MIDSOLE PENETRATION RESISTANCE

All the same features of S4 footwear with the added benefit of midsole penetration resistance.

S6

LEAK-PROOF

All the same features of S2 footwear with the added benefit of waterproof footwear (WR).

S7

LEAK-PROOF WITH MIDSOLE PENETRATION RESISTANCE

All the same features of S3 footwear with the added benefit of waterproof footwear (WR). Other symbols can be added, such as S7L and S7S.

WHAT ARE EN ISO 20345:2011 AND EN 20345:2022

EN ISO 20345:2011 OVERVIEW

EN ISO 20345:2011 specifies basic and additional (optional) requirements for safety footwear. This standard ensures that footwear offers protection against various workplace hazards.

KEY FEATURES

Toe protection against a 200-joule impact. Standards for slip resistance, anti-static properties, water resistance, and energy absorption in the heel.

APPLICABLE ABBREVIATIONS

SB
Basic safety requirements

SRA
Tested on ceramic tile wetted with sodium lauryl sulphate (A diluted soap solution)

SRB
Tested on steel with glycerol

SRC
Tested under SRA and SRB conditions

S1
SB + closed seat region, antistatic, energy absorption in heel

S1P
S1 + penetration resistance

S2
S1 + water penetration and absorption

S3
S2 + cleated outsole

S4
SB + waterproof footwear, antistatic, energy absorption in heel

S5
S4 + penetration resistance, cleated outsole

A
Antistatic

E
Energy absorption in heel

EN ISO 20345:2022 OVERVIEW

EN ISO 20345:2022 updates the previous standard to include new requirements and testing methods for improved safety and performance of protective footwear.

KEY FEATURES

Enhanced slip resistance requirements. New testing methods for puncture resistance. Updated criteria for ergonomic features.

WHAT IS EN343

EN343 is a European Standard for protective clothing that outlines a minimum level of protection against wet weather.

Items are assessed on two criteria; the first **(X)** judges its ability to protect against water penetration, while the second **(Y)** measures breathability in those conditions. They are then rated from one to three in these categories:

This rating is included on the CE label inside the garment, where the EN343 mark will be followed by two numbers.

(X) WATER PENETRATION RESISTANCE		**(Y) BREATHABILITY**	
1	Minimum level of rain protection	**1**	Not classified as breathable under EN343
2	Intermediate rain protection	**2**	Intermediate level of breathability
3	Highest level of rain protection	**3**	Highest level of breathability

CASTLE CLOTHING LTD

WORKWEAR FOR A HARD-WORKING NATION

For over 50 years, Castle Clothing has been designing and supplying workwear to help hardworking people get the job done.

Our portfolio includes our own brands TuffStuff, Fort and Champion, alongside Makita Workwear, which we proudly manufacture and distribute under licence for the UK and Ireland.

Trusted by retailers. Worn by professionals. Built for hard work.

Blyth Road Industrial Estate, Halesworth, Suffolk, IP19 8EN
